Re: Results of 30 day FPC-1 test conducted by Fraley and Schilling, Inc.

Dear Mr. Borden,

I am pleased to present you with the results, of the recently completed internal Fraley and Schilling, Inc. test, utilizing **FPC-1**. We conducted an approximate 30 day test of **FPC-1**, during March 2007, in two of our Mercedes engine Freightliner tractors. Per your direction, this test was conducted by establishing a baseline fuel economy in each vehicle and defining multiple variables including drivers, routes and loads. The results are as follows:

Results of 30 Day Test Utilizing FPC-1			
Unit	Untreated MPG	Treated MPG	MPG Difference
2402	5.66	6.09	+ 7.60%
2710	5.84	6.20	+ 6.16%

These results demonstrate that FPC-1 performs as indicated in the product literature.

Sincerely,

Mr. Richard Ferguson, Terminal Manager, Brilliant, Ohio
 Fraley and Schilling, Inc.
